

Proposed pavement widening east end of Leeds Street to improve pedestrian safety at Canterbury Primary School arrival and departure

- (a) Leeds Street - has a high pedestrian flow particularly before and after school times. Widening the pavement/naturestrip on both sides of Leeds Street so that it is the same width towards the Leeds Street crossing is proposed. (middle arrow & bottom arrow)
- (b) Aerial photo captures ute illegally parked on verge. (top arrow)

Photos showing existing narrowing of the pavement/naturestrip at the Eastern end of Leeds Street on both sides of the street.
